CORE SKILLS

AI-Assisted Development: Base44, Cursor, Claude, ChatGPT, Gemini, GitHub Copilot, NotebookLM; prompt-driven app and workflow building

Systems & Automation: Business web apps, inventory and stock systems, invoice and cash auditing, Square API integration, Kajabi email automation, AI workflows and questionnaires

Full-Stack (Hand-Coded): MongoDB, Express, React, Node.js, REST APIs, JavaScript, HTML/CSS, Git and GitHub

Web Platforms & SEO: Kajabi, Squarespace, Wix Studio, WordPress; Google Analytics, Search Console

QA & Tools: Test cases, bug reporting, Jira, Slack, Google Workspace; also Python, PHP, MySQL, Bootstrap

PROFESSIONAL EXPERIENCE

Freelance Systems & Automation Developer (AI-Assisted)

Jun 2026 – Present

Remote | Clients in Australia and the UK

Australian Hospitality / Food Retail Group (multi-location)

Jul 2026 – Present

- Built and deployed a centralized web app on Base44 that consolidates stock management, daily multi-location stock counts, invoice auditing, and daily cash-register audits into one system.
- Created custom AI workflows and interactive questionnaires to automate routine tasks, store inquiries, operational audits, and admin handling.
- Automated email booking flows and daily stock reports in Kajabi, reducing manual admin work and speeding up client response time.
- Built and maintain the group's multi-location Kajabi and Squarespace websites with consistent branding, plus SEO work to improve organic search visibility.

UBMA.org (UK-based organization)

Jun 2026 – Present

- Maintain ubma.org: content updates, accuracy, and site functionality.
- Run social media end to end: planning, scheduling, and publishing content to grow engagement.
- Provide remote administrative support and coordination for the organization's online presence.

Professional Software Engineering Intern

Dec 2025 – Apr 2026

Fildev Cloud Business and Software | Software company internship

- QA: wrote test cases, reported bugs, and validated fixes before release across multiple features.
- Built full-stack features in the MERN stack and contributed to architecture decisions for a multi-module web platform.
- Authored system architecture documents, technical diagrams, and internal docs as in-house Technical Consultant.
- Resolved UI inconsistencies in Wix Studio, built SEO backlink structures, and maintained WordPress sites.

SELECTED PROJECTS

Daily Stock Flow (client project, NDA)

2026

Inventory and sales tracking system integrated with the Square API and workflow automation. Details limited by NDA.

Vantage: Financial Management App

2026

Built end to end on Base44. Tracks personal or business money flow with categorization, organized data views, and automated workflows for repetitive entry.

Loan Management System (Capstone)

2025 – 2026

Full-stack, web-based loan management system developed from requirements through deployment, with secure architecture and database integration.

Scheduling System & Python Financial Tracker

2024 – 2025

Led a student team that built a scheduling system for the School Registrar and a Python-based financial tracker.

EDUCATION

Bachelor of Science in Information Technology, City College of Calamba

2022 – 2026

TRAINING & LEADERSHIP

Anthropic course completions: AI Fluency (Students; Framework & Foundations); Claude 101; Claude Code in Action; Intro to Agent Skills

IT Society: Class Representative (2025–26); Academic Committee (2024–25); Social Media Manager (2023–24)
